Introduction

The second pre-release of the EVS 2017 (Version 2.0.0, 2019-07-15) includes data and documentation of 30 participating countries. To make the data accessible in a user-friendly way, the Methodological Guidelines, a Method Report, and a Variable Report including harmonization reports on the integrated data are provided.

The report at hand offers a description of the Integrated Dataset on variable level. The Variable Documentation does not contain any frequency counts by country (sample) for the variables, yet. They will be provided for the upcoming data releases. The report is structured into four sections:

- Section 1 provides brief information on the EVS 2017.
- Section 2 refers to the structure of the dataset and standardization efforts made.
- Section 3 gives a short explanation of the Variable Documentation.
- Section 4 contains the Variable Documentation created for the Integrated Datasets.

Access to EVS data and documentation

The data and documentation of the EVS 2017 Integrated Dataset is accessible free of charge via the GESIS Data Archive's retrieval systems.

[GESIS Data Catalogue](#) contains a study description providing substantial and methodological information on the data as well as version history and errata. It supports direct access to EVS data and documentation for download. Data downloads are possible after registration.

How to cite the data

EVS (2019): European Values Study 2017: Integrated Dataset (EVS 2017) - Second pre-release. GESIS Data Archive, Cologne. ZA7500 Data file Version 2.0.0, doi:[10.4232/1.13314](https://doi.org/10.4232/1.13314).

How to cite this publication

EVS, GESIS (2019): EVS 2017 – Variable Reports. GESIS-Variable Reports 2019/12. GESIS Data Archive, Cologne, v1.

Citation requirements

Publications based on EVS data should acknowledge this by means of bibliographic citations as listed in the Method Report, item Citation Requirements. To ensure that such source attributions are captured for social science bibliographic utilities, citations must appear in the footnotes or in the reference section of publications.

Usage requirement

To provide funding agencies with essential information about the use of EVS data and to facilitate the exchange of information about the EVS, users of EVS data are kindly asked to send bibliographic citations and/or electronic copies of each completed report, article, conference paper or thesis abstract using EVS data to the EVS at Tilburg University at evsrepository@uvt.nl.

For more information, see <https://europeanvaluesstudy.eu/education-dissemination-publications/>.

Disclaimer

EVS, GESIS, and the producers bear no responsibility for the use of EVS data, or for interpretations or inferences based on these uses. EVS, GESIS, and the producers accept no liability for indirect, consequential or incidental damages or losses arising from use of the data collection, or from the unavailability of, or break in access to the service for whatever reason.

1 European Values Study 2017

As previous waves conducted in 1981, 1990, 1999, 2008, the fifth EVS wave maintains a persistent focus on a broad range of values. Questions with respect to family, work, religious, and political and societal values are highly comparable across waves and regions, making EVS suitable for research aimed at studying trends over time.

The new wave has seen a strengthening of the methodological standards (see the EVS 2017 Methodological Guidelines and the EVS 2017 Method Report), also thanks to the participation in the SERISS project (<https://seriss.eu/>). Table 1 gives an overview of all countries included in EVS waves.

** Countries included in the second pre-release of the EVS 2017 wave.

Table 2 provides summarized information about fieldwork period, mode of data collection, sample size, and languages fielded for the 30 countries included in the second pre-release. More than 56.000 persons, selected through random sampling, were interviewed personally (face-to-face) and via Web and postal interviews.

Table 2: Fieldwork period, mode, and languages used

Country	Fieldwork period	Mode of data collection	Sample size	Languages fielded
Albania	24-02-2018 - 24-06-2018	PAPI	1435	Albanian, English
Armenia	20-02-2018 - 30-04-2018	PAPI	1500	Armenian
Austria	08-01-2018 - 14-05-2018	CAPI	1644	German
Azerbaijan	10-11-2018 - 23-12-2018	PAPI	1800	Azerbaijani, Russian
Belarus	01-02-2018 - 05-03-2018	PAPI	1548	Russian
Bulgaria	11-11-2017 - 09-01-2018	PAPI	1560	Bulgarian
Croatia	25-10-2017 - 16-02-2018	CAPI	1488	Croatian
Czechia	17-09-2017 - 03-12-2017	CAPI / PAPI	1812	Czech

Slovenia	30-09-2017 - 23-12-2017	CAPI	1076	Slovenian
Spain	28-11-2017 - 22-01-2018	CAPI	1211	Spanish
Sweden	27-09-2017 - 06-06-2018	CAPI	1194	Swedish
Switzerland	11-09-2017 - 22-02-2018 15-09-2017 - 28-12-2017 30-09-2017 - 22-02-2018	CAPI CAWI / Mail	3660	German, French, Italian

Dataset structure and variable definition

As for previous EVS waves, the structure of the integrated dataset as well as the metadata of the variables follow as far as possible the structure of the English Master Questionnaire (CAPI).

Naming conventions

Although variables names are not harmonized across waves, all standard variables are build in the scheme "xNNN" (e.g. v130). The naming and sequence of variables follows the naming and sequence of questions in the English Master Questionnaire (CAPI).

Exceptions are constructed variables, country-specific variables, and administrative variables (see section 2.2 Administrative and ID variables). The harmonized variables generally have an intuitive suffix (see section 2.3 International standards and EVS coding frames).

Missing values and definition

In general, the missing values are standardized across EVS waves. For all variables a set of negative missing values is defined (values: -1 to -6); for EVS 2017 additional (question specific and design specific) missing values are necessary. Tabel 3 displays the missing values used in the second pre-release.

Table 3: Missing value definition

Type of missing value	In Master Questionnaire, field questionnaires, Standard syntax	In Integrated Dataset	Variable label
General missing values	8/88/888/8888/88888	-1	don't know
	9/99/999/9999/99999	-2	no answer*
	7/77/777/7777/77777	-3	not applicable**
	-	-4	item not included***
	-	-5	other missings****
	55555	-6	na because of survey break-off
CAWI / MAIL		-7	matrix not applied (_FU variables only)
		-8	follow-up non response
		-9	no follow-up
		-10	multiple answers (Mail)
Question specific missing values	6	6	never had a paid job
	6/66	6/66	does not apply to me
	0	0	no formal education
	7	7	not allowed to vote
	3	3	other answer (code if volunteered only)
	-	9999	no answer

* No answer is used for: refusal, wild codes if not possible to correct; system missing values if not possible to reconstruct; impossible high/low values; anonymization measures on case level.

** Not applicable is used for: missing values which result from filter questions; missing values in administrative variables.

*** Item not included: i.e. question/item not included in country's field questionnaire; not provided by national team; not included for anonymization reasons.

**** Other missing values: is used for system missing in previous EVS waves.

Dummy variables

Dummy variables are generated for multiple-response questions. E.g. a question with four answer categories in an item battery has four dummy variables as final data. In general, a value "1" means that the respondent choose the particular category as an answer (mentioned, yes, ...). In case of a value "2" the respondent did not choose the particular category as answer (not mentioned, no, ...). Dummy variables are also created for "None of these", "Don't know", or "No Answer" referring to the whole question. Inconsistencies between choosing category 'none of these' and other mentioned items of a battery are flagged by flag variables.

Time variables

The time variables in Table 4 are created for question Q108 'Time of interview'. They provide information on start time and end time of interview as well as duration of interview.

Table 4: Time of interview

Variable name	Variable label	Summarized notes
v278c_r	start time interview (Q108) (constructed)	Constructed variable on the basis of v278a (time of interview: start hour (Q108)) and v278b (time of interview: start minute (Q108)) in a numeric values format.
v279c_r	end time interview (Q108) (constructed)	Constructed variable on the basis of v279a (time of interview: end hour (Q108)) and v279b (time of interview: end minute (Q108)) in a numeric values format.
v279d_r	duration of interview in minutes (constructed) (Q109)	Constructed variable as the difference of v279c_r and v278c_r in a numeric values format.

To transform the numeric values format of the time variables into a time format in SPSS, following SPSS commands can be used:

- formats `variablename(time5)` (to display the time format as 00:00)
- formats `variablename(time8)` (to display the time format as 00:00:00)

To transform the time format back into a numeric value format, the following command can be used in SPSS:

- formats `variablename(f5)`.

1.1 Mixed mode and matrix design

For more information: Variable Report App D: Guide Mixed-Mode Matrix

The document outlines the main characteristics of the implementation of the mixed-mode strategy in EVS17. The strategy was adopted, in different forms, by six countries: Switzerland, Iceland, Netherlands, Germany, Finland, and Denmark. Table 5 gives an overview of the mixed-mode, matrix design, and responsive design protocol variables created for the implementation of the concepts in the integrated dataset.

Table 5: Overview of mixed-mode, matrix design, responsive design variables

Variable name	Variable label
mode	mode of data collection
mm_select_sample	FLAG MIXED MODE: subsamples on mode variables
mm_mixed_mode	mixed mode/matrix design
mm_mode_fu	mode of data collection (follow-up)
mm_matrix_group	matrix attribution (group/variable bloc)
mm_fw_start_fu	year/month of start-fieldwork (matrix design)
mm_fw_end_fu	year/month of end-fieldwork (matrix design)
mm_year_fu	survey year (follow-up)
mr_detailed_mode_DE	survey mode in detail CAPI/CAWI/MAIL sample (Germany)
mr_contact_mode_DE	contact mode CAWI/MAIL (Germany)
mr_incentive_DE	incentive in Euros CAPI/CAWI/MAIL (Germany)
mm_v277_fu	date of interview (Q107) (follow-up)
mm_v278a_fu	time of interview: start hour (Q108) (follow-up)
mm_v278b_fu	time of interview: start minute (Q108) (follow-up)
mm_v279a_fu	time of interview: end hour (Q108) (follow-up)
mm_v279b_fu	time of interview: end minute (Q108) (follow-up)

1.2 Administrative and ID variables

Administrative variables are used mainly to identify datasets with regard to version, wave, and country. Besides ID variables 'caseno' and 'id_cocas' uniquely identifying the respondent in the national and integrated data, variable 'v282' is for interviewers conducting CAPI interviews (see Table 6). They contain different kinds of variables:

- Technical variables for identifying the dataset or cases
- Cumulation specific variables combining the information of different variables
- Special compound variables for creation of customized data files

Table 6: Overview of administrative variables

Variable name	Variable label
studyno	GESIS study number
studynoc	GESIS study number (national dataset)
version	GESIS archive version
versionc	GESIS archive version (national dataset)
doi	Digital Object Identifier
id_cocas	unified respondent number
caseno	original respondent number
v282	interviewer number
year	survey year
fw_start	year/month of start-fieldwork
fw_end	year/month of end-fieldwork
Country	country code (ISO 3166-1 numeric code)
ctry_y	country and year of FW (ISO 3166-1 numeric code)
c_abrv	country abbreviation (ISO 3166-1 Alpha-2 code)
mode	mode of data collection

language	language in which the interview was taken
----------	---

Identification variables

Each record in the data file contains two identification variables:

- caseno: 'Original respondent number'
- id_cocas: 'Unified respondent number' (structured as a 13 digit code: YYYY (year of wave), CCC(country ISO 3166-1), NNNNNNN (caseno)).

Variables with country codes

Table 7 gives an overview of the ISO 3166-1 numeric and alphanumeric country codes used in EVS 2017 and previous EVS waves.

Table 7: Country codes (ISO 3166-1)

Country/Region	Country abbreviation ISO 3166-1 alpha-2	ISO 3166-1 (3 digits)
Albania	AL	8
Azerbaijan	AZ	31
Austria	AT	40
Armenia	AM	51
Bulgaria	BG	100
Belarus	BY	112
Croatia	HR	191
Czechia	CZ	203
Denmark	DK	208
Estonia	EE	233
Finland	FI	246
France	FR	250
Georgia	GE	268
Germany	DE	276
Great Britain	GB	826
Hungary	HU	348
Iceland	IS	352
Italy	IT	380
Lithuania	LT	440
Netherlands	NL	528
Norway	NO	578
Poland	PL	616
Romania	RO	642
Russia	RU	643
Serbia	RS	688
Slovakia	SK	703
Slovenia	SI	705
Spain	ES	724
Sweden	SE	752
Switzerland	CH	756

The overview in Table 8 lists variables for which country identifiers (ISO 3166-1 numeric or alphanumeric) were added to values. Information about the composition of values is given as well.

Table 8: Variables with ISO 3166-1 country codes

Variable	Variable Label	Composition of values: (cc=country code)
country	country code (ISO 3166-1 numeric code)	CC-ISO (3 digits)
entry_y	country and year of FW (ISO 3166-1 numeric code)	CC-ISO (3 digits) + YEAR (2 digits)
c_abrv	country abbreviation (ISO 3166-1 Alpha-2 code)	CC- ISO 3166-1 alpha-2
id_cocas	unified respondent number	YYYY + CC-ISO (3digits) + NNNNNNN
v52_cs	which religious denomination do you belong to (Q13a) (standardized)	CC-ISO (3 digits) + VALUE (2 digits)
v174_cs	which political party appeals to you most (Q49)	CC-ISO (3 digits) + VALUE (2 digits)
v175_cs	is there another party that appeals to you (Q49a)	
v228b	respondents country of birth (ISO 3166-1/3 alpha code) (Q66)	CC-ISO (3166-1/3 alpha code) (2/4 digits)
v228b_r	respondents country of birth (ISO 3166-1 numeric code) (Q66)	CC-ISO (3 digits)
v231b	father country of birth (ISO)	CC-ISO (3166-1/3 alpha code) (2/4 digits)
v231b_r	father country of birth - ISO 3166-1code (Q115a)	CC-ISO (3 digits)
v233b	mothers country of birth (ISO 3166-1/3 Alpha code) (Q71)	CC-ISO (3166-1/3 alpha code) (2/4 digits)
v233b_r	mothers country of birth (ISO 3166-1 numeric code) (Q69)	CC-ISO (3 digits)
v251b	spouse/partners country of birth (ISO 3166-1/3 Alpha code) (Q88a)	CC-ISO (3166-1/3 alpha code) (2/4 digits)
v251b_r	spouse/partners country of birth (ISO 3166-1 numeric code) (Q88a)	CC-ISO (3 digits)
v243_cs	educational level respondent: country-specific, ISO 3166-1 (Q81)	CC- ISO (3 digits) + VALUE (2 digits)
v252_cs	educational level spouse/partner: country-specific, ISO 3166-1 (Q89)	CC- ISO (3 digits) + VALUE (2 digits)
v262_cs	educational level father: country-specific, ISO 3166-1 (Q99)	CC- ISO (3 digits) + VALUE (2 digits)
v263_cs	educational level mother: country-specific, ISO 3166-1 (Q100)	CC- ISO (3 digits) + VALUE (2 digits)
v275c_N1	region where interview was conducted: ISO_NUTS-1 code (Q105)	CC- ISO (3 digits) + VALUE (2 digits)
v275c_N2	region where interview was conducted: ISO_NUTS-2 code (Q105)	CC- ISO (3 digits) + VALUE (4 digits)
v281a	language of interview (ISO 639-1 Alpha code) (Q110)	ISO 639-1 alpha code (2 digits)
v281a_r	language of interview (ISO 3166-1 numeric 3-digit) (Q110)	CC- ISO (3 digits)

1.3 Data quality checks

The Data Processing Guidelines for EVS 2017 (see Methodological Guidelines, App A6) give an overview of the datasets to be created during the data processing workflow and the variables to be included. It also provides information on possible errata in the data and information on main steps for data checking taken by the national teams in collaboration with the central team. Finally, to standardize the data editing processes as far as possible across countries, the Guidelines summarize the rules and conditions for data editing the national teams and the central team agreed on.

Two main rules for treatment of errors or contradictions between variables were suggested:

- Data problems should be corrected and documented by the national teams, if less than 1% of cases were affected in a sample. If more than 1% of cases were affected, and a systematic deviation could be assumed, the data should not be cleaned but documentation should be provided.
- In case of non-conformance with interviewer instructions and illogic answer-pattern, the data should not be cleaned but the problems should be documented.

Standardized check procedures were applied and flag variables were created, that treat such non-conformities in a common way and leave correction decisions up to the final data users.

The EVS 2017 data was checked for wild codes and outliers, system missing codes, filter inconsistencies, contradictions between variables of item batteries, non-conformed interviewer instructions, illogic answer-patterns.

Special check procedures were implemented for checking the consistent implementation of the matrix design and responsive design concepts in the data.

During the data processing, the communication between national teams and central team was based on national data cleaning report and syntax files transferred between the central team and national teams. The Programme Directors and their teams were asked to evaluate and approve both, all modifications of the national data done by the central team and the quality of the Integrated Dataset.

The myEVS portal was the central place for the communication and collaboration during the survey.

Cleaning rules for DK and NA items/categories

The answer categories DK and NA were used differently in the item batteries of the English Master Questionnaire and in the field questionnaires of the countries. Table 9 gives an overview of related item batteries.

Table 9: Item batteries with DK and NA items

Item battery	Substantive items	Items "DK" "NA" "None of these"
Q4: do you belong to: religious organization	v9 to v20	v20 None of these v20a DK v20b NA
Q6: dont like as neighbours: people of different race	v22 to v30	V30a None of these v30b DK V30c NA
Q11: important in a job: good pay	v40to v45	v45a None of these v45b DK v45c NA
Q28: learn children at home: good manners	v85 to v96	v96 None of these v96a DK v96b NA

They were included as possible answer category of each single item or as additional items related to the whole question. To treat the differences between the countries in the same way, two rules were applied:

- DK or NA were coded as additional items only if they were also included as possible answer category to the whole question in the field questionnaire/national data (i.e., the same cases are coded across all items of the item battery as DK or NA) to adhere to the question format of the field questionnaire as much as possible
- If DK and NA were included as additional items, the single items of the battery were also coded as DK and NA (but not as 2 'not mentioned') to treat the 'not mentioned' category in the same way.

Figure 1: Treatment of DK/NA categories in item batteries

item	mentioned	not mentioned	DK	NA
V1			x	x
V2			x	x
V3			x	x
DK	x			
NA	x			

Flag variables indicating inconsistencies

For the most common non-conformed interviewer instructions and illogic answer-patterns across national datasets flag variables were created which mark such non-conformities and leave correction-decisions up to the researcher. Information about both, flag and flagged variables, is provided by notes in the Variable Documentation. Example:

Flagged variable: v110 'aims of respondent: most important (Q34)'

Note: Please see flag variable f110 which indicates inconsistencies for variables v110/v111.

Flag variable: f110 'flag variable: flag variable: aims of respondent (Q34/Q35)'

Indicates inconsistencies for the variables v110/v111.

If most important aim is identical with 2nd most important aim.

if v110 = v111 then f110=1; 0 'consistent'; 1 'inconsistent'

Three types of non-conformities were flagged

1. 'First/second choice' variables, which were flagged in case the value of the variable for the first choice equaled to the value of the variable for the second choice.

Variables: v108/v109 - f108; v110/v111 - f110

2. 'Multiple response question' variables, which were flagged in case respondents chose more than the maximally permitted items.

Variables: v85 to v95 - f85

3. 'None-item battery' variables, which were flagged in case the answer-pattern of the 'none"-item variable and the other variables of the item battery was illogic.

Variables: v9 to v20 - f20; v22 to v30 - f30a; v40 to v45 - f45a; v85 to v96 - f96

If 'None of these' is not included as additional item in field questionnaire, it is coded as -4
,item not included'

A flag variable is added to indicate inconsistencies:

- 0 'Consistent'
- 1 'Inconsistent: respondent mentions at least one organization and "none of these"
- 2 'Inconsistent: respondent is coded DK or NA for at least one item, but mentioned "none of these"
- 3 'Inconsistent: "none of these" is coded DK or NA, although it only allows for spontaneous mention (design error)'.

Reversed coding of question Q51/variable v184 in EVS17 Master Questionnaire

Related to the the data of Austria, Bulgaria, Netherlands, Slovenia, Slovakia:

In contrast to other questions, values in item Q51 (see Figure 2) are assigned in descending order, from 5 'very good' to 1 'very bad' in the Master Questionnaire. Some countries assigned the codes differing from this in ascending coding from 1 'very good' to 5 'very bad'. In this case, the data have been recoded according to the Mater Questionnaire.

Figure 2: Coding of question Q51/v184

Q51 Now we would like to know your opinion about the people from other countries who come to live in [your country] - the immigrants. How would you evaluate the impact of these people on the development of [your country]?	
<input type="checkbox"/> <input type="checkbox"/> (v184)	
5 – Very good 4 – Quite good 3 – Neither good, nor bad 2 – Quite bad 1 – Very bad <hr/> 8 – don't know (spontaneous) 9 – no answer (spontaneous)	

Notes on deviating filtering

In general, the data have been cleaned according to the skip pattern of the Master Questionnaire. Systematic filter deviations in national datasets (not included filters or additional filters) were marked by variable notes, not by flag variables.

1.4 International standards and EVS coding frames

International standards and EVS coding frames are used for harmonization/standardization of data concerning variables on religion, political party preference, occupation, education, income, and region. Tables 10 to 14 give an overview of the harmonized substantive and socio-demographic variables. More detailed information is provided in the respective appendices of the variable report.

In addition to the harmonized variables, the source variables are available in the data. These standardized country-specific variables are indicated with a respective suffix "_cs". They contain country identifier (ISO 3166-1) and the given order of country-specific categories in the field questionnaires. References to the respective harmonized variables are added as notes in the variable documentation.

1.4.1 Religion

For more information: Variable Report App A1: Religious denomination

It describes the standards used and gives insights into the harmonization process including the mapping of country-specific source and target variables. An overview of variables on Religion is given in Table 10.

Table 10: Religious denomination

Variable name	Variable label	Summarized notes
v52_cs	which religious denomination do you belong to (Q13a) (standardized)	Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific categories (religious denominations). This variable has been harmonized into v52 (see App A1).
v52	which religious denomination do you belong to (Q13a) (harmonized)	Harmonized variable: country-specific categories have been recoded according to common dictionary. For country-specific variable, see v52_cs (see App A1).

1.4.2 Political parties/preference

For more information: Variable Report App A2: Left-Right positioning of political parties

It describes the standards used and gives insights into the harmonization process including the mapping of country-specific source and target variables. An overview of variables on Political parties/preference is given in Table 11.

Table 11: Political parties/preferences

Variable name	Variable label	Summarized notes
v174_cs	which political party appeals to you most (Q49)	Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific categories (political parties). This variable has been harmonized into v174_LR (left-right scale variable) (see EVS 2017 Variable Report, App A2).
v174_lr	political party: appeals to you most: left/right scale (Q49)	Harmonized variable: country-specific categories have been recoded according to the placement of national political parties on a left-right scale as delivered by country. For country-specific variable, see v174_cs (see EVS 2017 Variable Report, App A2).
v175_cs	is there another party that appeals to you (Q49a)	Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific categories (political parties). This variable has been harmonized into v175_LR (left-right scale variable) (see EVS 2017 Variable Report, App A2).
v175_lr	political party: another appeals to you: left/right scale (Q49a)	Harmonized variable: country-specific categories have been recoded according to the placement of national political parties on a left-right scale as delivered by country. For country-specific variable, see v175_cs (see EVS 2017 Variable Report, App A2).

1.4.3 Educational level

For information on the concepts, see Methodological Guidelines, App A1: Classifications.

For information on the variables see Variable Report App A3 Education/App A4 Mapping Education

It describes the standards used and gives insights into the harmonization process including the mapping of country-specific source and target variables. The second appendix provides information about the mapping of variable '_edulvib' and further harmonized classifications. An overview of educational variables included in the second pre-release is given in Table 12.

Table 12: Educational level

Variable name	Variable label	Summarized notes
v243_cs	educational level respondent: country-specific, ISO 3166-1 (Q81)	Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific educational categories. Variable has been harmonized according to ESS-edulvbl (see EVS 2017 Variable Report, App A3).
v243_edulvbl	educational level respondent: ESS-edulvbl coding (Q81)	Harmonized variable: highest educational level achieved using the ESS-edulvbl classification scheme. For country-specific variable, see v243_cs (see EVS 2017 Variable Report, App A3).
v243_edulvbl_2	educational level respondent: ESS-edulvbl coding two digits (Q81)	Harmonized variable: highest educational level achieved using the ESS-edulvbl classification scheme. For country-specific variable, see v243_cs (see EVS 2017 Variable Report, App A3 and A4).
v243_edulvbl_1	educational level respondent: ESS-edulvbl coding one digit (Q81)	Harmonized variable: highest educational level achieved using the ESS-edulvbl classification scheme. For country-specific variable, see v243_cs (see EVS 2017 Variable Report, App A3 and A4).
v243_ISCED_3	educational level respondent: ISCED-code three digit (Q81)	Harmonized variable: highest educational level achieved – based on the ESS-edulvbl classification scheme. For country-specific variable, see v243_cs (see EVS 2017 Variable Report, App A3 and A4).
v243_ISCED_2	educational level respondent: ISCED-code two digit (Q81)	Harmonized variable: highest educational level achieved – based on the ESS-edulvbl classification scheme. For country-specific variable, see v243_cs (see EVS 2017 Variable Report, App A3 and A4).
v243_ISCED_1	educational level respondent: ISCED-code one digit (Q81)	Harmonized variable: highest educational level achieved – based on the ESS-edulvbl classification scheme. For country-specific variable, see v243_cs (see EVS 2017 Variable Report, App A3 and A4).
v243_EISCED	educational level respondent: ES-ISCED coding (Q81)	Harmonized variable: highest educational level achieved – based on the ESS-edulvbl classification scheme. For country-specific variable, see v243_cs (see EVS 2017 Variable Report, App A3 and A4).
v243_r	educational level respondent: recoded (Q81)	Harmonized variable: highest educational level achieved – based on the ESS-edulvbl classification scheme. For country-specific variable, see v243_cs (see EVS 2017 Variable Report, App A3 and A4).
v252_cs	educational level spouse/partner: country-specific, ISO 3166-1 (Q89)	Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific educational categories. Variable has been harmonized according to ESS-edulvbl (see EVS 2017 Variable Report, App A3).
v252_edulvbl	educational level spouse/partner: ESS-edulvbl coding (Q89)	Harmonized variable: highest educational level achieved using the ESS-edulvbl classification scheme. For country-specific variable, see v252_cs (see EVS 2017 Variable Report, App A3).
v252_edulvbl_2	educational level spouse/partner: ESS-edulvbl coding two digits (Q89)	Harmonized variable: highest educational level achieved using the ESS-edulvbl classification scheme. For country-specific variable, see v252_cs (see EVS 2017 Variable Report, App A3 and A4).
v252_edulvbl_1	educational level spouse/partner: ESS-edulvbl coding one digit (Q89)	Harmonized variable: highest educational level achieved using the ESS-edulvbl classification scheme. For country-specific variable, see v252_cs (see EVS 2017 Variable Report, App A3 and A4).
v252_ISCED_3	educational level spouse/partner: ISCED-code three digit (Q89)	Harmonized variable: highest educational level achieved using the ESS-edulvbl classification scheme. For country-specific variable, see v252_cs (see EVS 2017 Variable Report, App A3 and A4).

v252_ISCED_2	educational level spouse/partner: ISCED-code two digit (Q89)	Harmonized variable: highest educational level achieved using the ESS-edulvlb classification scheme. For country-specific variable, see v252_cs (see EVS 2017 Variable Report, App A3 and A4).
v252_ISCED_1	educational level spouse/partner: ISCED- code one digit (Q89)	Harmonized variable: highest educational level achieved using the ESS-edulvlb classification scheme. For country-specific variable, see v252_cs (see EVS 2017 Variable Report, App A3 and A4).
v252_EISCED	educational level spouse/partner: ES-ISCED coding (Q89)	Harmonized variable: highest educational level achieved using the ESS-edulvlb classification scheme. For country-specific variable, see v252_cs (see EVS 2017 Variable Report, App A3 and A4).
v252_r	educational level spouse/partner: recoded (Q89)	Harmonized variable: highest educational level achieved using the ESS-edulvlb classification scheme. For country-specific variable, see v252_cs (see EVS 2017 Variable Report, App A3 and A4).
v262_cs	educational level father: country-specific, ISO 3166-1 (Q99)	Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific educational categories. Variable has been harmonized according to ESS-eduvlbl (see EVS 2017 Variable Report, App A3).
v262_edulvlb	educational level father: ESS-edulvlb coding (Q99)	Harmonized variable: highest educational level achieved using the ESS-edulvlb classification scheme. For country-specific variable, see v262_cs (see EVS 2017 Variable Report, App A3).
v262_edulvlb_2	educational level father: ESS-edulvlb coding two digits (Q99)	Harmonized variable: highest educational level achieved using the ESS-edulvlb classification scheme. For country-specific variable, see v262_cs (see EVS 2017 Variable Report, App A3 and A4).
v262_edulvlb_1	educational level father: ESS-edulvlb coding one digit (Q99)	Harmonized variable: highest educational level achieved using the ESS-edulvlb classification scheme. For country-specific variable, see v262_cs (see EVS 2017 Variable Report, App A3 and A4).
v262_ISCED_3	educational level father: ISCED-code three digit (Q99)	Harmonized variable: highest educational level achieved using the ESS-edulvlb classification scheme. For country-specific variable, see v262_cs (see EVS 2017 Variable Report, App A3 and A4).
v262_ISCED_2	educational level father: ISCED-code two digit (Q99)	Harmonized variable: highest educational level achieved using the ESS-edulvlb classification scheme. For country-specific variable, see v262_cs (see EVS 2017 Variable Report, App A3 and A4).
v262_ISCED_1	educational level father: ISCED- code one digit (Q99)	Harmonized variable: highest educational level achieved using the ESS-edulvlb classification scheme. For country-specific variable, see v262_cs (see EVS 2017 Variable Report, App A3 and A4).
v262_EISCED	educational level father: ES-ISCED coding (Q99)	Harmonized variable: highest educational level achieved using the ESS-edulvlb classification scheme. For country-specific variable, see v262_cs (see EVS 2017 Variable Report, App A3 and A4).
v262_r	educational level father: recoded (Q99)	Harmonized variable: highest educational level achieved using the ESS-edulvlb classification scheme. For country-specific variable, see v262_cs (see EVS 2017 Variable Report, App A3 and A4).
v263_cs	educational level mother: country-specific, ISO 3166-1 (Q100)	Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific educational categories. Variable has been harmonized according to ESS-eduvlbl (see EVS 2017 Variable Report, App A3).
v263_edulvlb	educational level mother: ESS-edulvlb coding (Q100)	Harmonized variable: highest educational level achieved using the ESS-edulvlb classification scheme. For country-specific variable, see v263_cs (see EVS 2017 Variable Report, App A3).
v263_edulvlb_2	educational level mother: ESS-edulvlb coding two digits	Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific educational categories. Variable has been harmonized according to ESS-eduvlbl (see EVS 2017 Variable Report, App A3).

	(Q100)	and A4).
v263_edulvib_1	educational level mother: ESS-edulvib coding one digit (Q100)	Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific educational categories. Variable has been harmonized according to ESS-eduvlbl (see EVS 2017 Variable Report, App A3 and A4).
v263_ISCED_3	educational level mother: ISCED-code three digit (Q100)	Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific educational categories. Variable has been harmonized according to ESS-eduvlbl (see EVS 2017 Variable Report, App A3 and A4).
v263_ISCED_2	educational level mother: ISCED-code two digit (Q100)	Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific educational categories. Variable has been harmonized according to ESS-eduvlbl (see EVS 2017 Variable Report, App A3 and A4).
v263_ISCED_1	educational level mother: ISCED-code one digit (Q100)	Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific educational categories. Variable has been harmonized according to ESS-eduvlbl (see EVS 2017 Variable Report, App A3 and A4).
v263_EISCED	educational level mother: ES-ISCED coding (Q100)	Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific educational categories. Variable has been harmonized according to ESS-eduvlbl (see EVS 2017 Variable Report, App A3 and A4).
v263_r	educational level mother: recoded (Q100)	Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific educational categories. Variable has been harmonized according to ESS-eduvlbl (see EVS 2017 Variable Report, App A3 and A4).

1.4.4 Job/Profession

ISCO08 4 digits: International Standard Classification of Occupations

Source(s): <https://www.ilo.org/public/english/bureau/stat/isco/isco08/index.htm>

Date: 21-06-2016 (Last update according to site ILO)

See also: EVS 2017 Methodological Guidelines; App A1, Classifications

Table 13: Job/Profession

Variable name	Variable label	Summarized notes
v246_ISCO_2	kind of job respondent - 2 digit ISCO08 code (Q84a)	Recoded (2-digit ISCO08) Source: v246_ISCO_4 (not included)
v246_SIOPS	kind of job respondent - 2 digit SIOPS08 code (Q84a)	See point 1.4.5
v246_ISEI	kind of job respondent - ISEI08 code (Q84a)	See point 1.4.5
v246_ESeC	kind of job respondent - ESeC08 code (Q84a)	See point 1.4.5

1.4.5 Variables of socio-economic status

SIOPS

- Standard International Occupational Prestige Scale (Treiman, 1977)
- Source classification: Ganzeboom, H. B. G. & Treiman, D. J. (1996), Internationally Comparable Measures of Occupational Status for the 1988 International Standard Classification of Occupations. Social Science Research, 25, 201-239.
- Source syntax to compute classification: Ganzeboom, Harry B.G.; Treiman, Donald J., "International Stratification and Mobility File: Conversion Tools." Amsterdam: Department of Social Research Methodology, <http://www.harryganzeboom.nl/ismf/index.htm>. Date last revision: 12 January 2010.
- See variables: v246_SIOPS, v255_SIOPS

ISEI

International Socio-Economic Index of Occupational Status (Ganzeboom et al., 1992)

- Source classification: Ganzeboom, H. B. G. & Treiman, D. J. (1996), Internationally Comparable Measures of Occupational Status for the 1988 International Standard Classification of Occupations. Social Science Research, 25, 201-239.
- Source syntax to compute classification: Ganzeboom, Harry B.G.; Treiman, Donald J., "International Stratification and Mobility File: Conversion Tools." Amsterdam: Department of Social Research Methodology, <http://www.harryganzeboom.nl/ismf/index.htm>. Date last revision: 12 January 2010.
- See variables: v246_ISEI, v255_ISEI

ESeC

- European Socio-economic Classification (Harrison et al., 2006)
- Source classification: Harrison, E., & Rose, D. (2006). The European socio-economic classification (ESeC) user guide. Colchester: Institute for Social and Economic Research, University of Essex.
- Source syntax to compute classification: <https://www.iser.essex.ac.uk/archives/esec/matrices-and-syntax> Date: 27-09-2006 (last update syntax).
- See variables: v246_ESeC, v255_ESeC

1.4.6 Income

In EVS 2017, deciles of the net household income distribution were used [Approximate WEEKLY, Approximate MONTHLY, Approximate ANNUAL].

For more information: Variable Report App B Income

It provides brief information on the decile approach and give insights into the sources used for deriving deciles as well as exchange rate.

See variable: v261 "households total net income (Q98) (standardized)"

1.4.7 Region of interview

The pre-release includes regional information on NUTS 1 and NUTS 2 level for variable 'region where interview was conducted'. Additionally to the variables applying the Nomenclature of Territorial Units for Statistics (in string format), variables applying an EVS specific coding frame (numeric NUTS variables using the coding scheme of EVS 2008) are included.

Source: <https://ec.europa.eu/eurostat/web/nuts/background>

For more information: Variable Report App C NUTS level 1-2-3

It provides a brief description of the standard used and gives information on regional codes created for countries for which no official NUTS code is available.

Table 14: NUTS variables

Variable name	Variable label	Summarized notes
v275b_N2	region where interview was conducted: NUTS-2 code (Q105)	Alphanumeric NUTS-1 code (2016) or country-specific regional code resembling NUTS as much as possible (see EVS 2017 Variable Report, App C). Source variable: v275b_N3 (not included for anonymization reasons)
v275b_N1	region where interview was conducted: NUTS-1 code (Q105)	Alphanumeric NUTS-1 code (2016) or country-specific regional code resembling NUTS as much as possible (see EVS 2017 Variable Report, App C). Source variable: v275b_N3 (not included for anonymization reasons)
v275c_N2	region where interview was conducted: ISO_NUTS-2 code (Q105)	EVS specific coding frame (applying the coding scheme of EVS 2008). Source variable: v275b_N3 (not included for anonymization reasons)
v275c_N1	region where interview was conducted: ISO_NUTS-1 code (Q105)	EVS specific coding frame (applying the coding scheme of EVS 2008). Source variable: v275b_N3 (not included for anonymization reasons)

1.4.8 Country of birth variables

International Organization for Standardization - Codes for the representation of names of countries and their subdivisions

Source: http://www.iso.org/iso/country_codes

Date: 21-07-2013

For more information: EVS 2017 Methodological Guidelines; App A1, Classifications

Table 15: Country of birth - ISO 3166-1 alpha-2 and numeric

Variable name	Variable label	Summarized notes
v228b	respondents country of birth (ISO 3166-1/3 alpha code) (Q66)	Verbatim recorded answers standardized according to ISO 3166-1/3 alpha-2 code.
v228b_r	respondents country of birth (ISO 3166-1 numeric code) (Q66)	Verbatim recorded answers standardized according to ISO 3166-1 numeric code.
v231b	fathers country of birth (ISO 3166-1/3 Alpha code) (Q69)	Verbatim recorded answers standardized according to ISO 3166-1/3 alpha-2 code.
v231b_r	fathers country of birth (ISO 3166-1 numeric code) (Q69)	Verbatim recorded answers standardized according to ISO 3166-1 numeric code.
v233b	mothers country of birth (ISO 3166-1 numeric code) (Q69)	Verbatim recorded answers standardized according to ISO 3166-1/3 alpha-2 code.
v233b_r	mothers country of birth (ISO 3166-1 numeric code) (Q69)	Verbatim recorded answers standardized according to ISO 3166-1 numeric code.

v251b	spouse/partners country of birth (ISO 3166-1/3 Alpha code) (Q88a)	Verbatim recorded answers standardized according to ISO 3166-1/3 alpha-2 code.
v251b_r	spouse/partners country of birth (ISO 3166-1 numeric code) (Q88a)	Verbatim recorded answers standardized according to ISO 3166-1 numeric code.

1.4.9 Language

For more information: EVS 2017 Methodological Guidelines; App A1, Classifications

Table 16: Language - ISO 639-1

Variable name	Variable label	Summarized notes
v281a	language of interview (ISO 639-1 Alpha code) (Q110)	Verbatim recorded answers standardized according to ISO 639-1 Alpha code.
v281a_r	language of interview (ISO 3166-1 numeric 3-digit) (Q110)	Verbatim recorded answers standardized according to ISO 3166-1 numeric code.

1.4.10 Weights

For more information: Variable Report E Weighting EVS17

It outlines the procedure used to compute the EVS17 weights and information on the source of the population statistics and adaptations required in each country. The provided weights and weight variables are listed in Table 17.

Table 17: Weights

Variable name	Variable label	Summarized notes
gweight	Calibration weights	These weights are aimed at adjusting some socio-demographic characteristics (age, sex, educational level and region of residence) in the sample population to the distribution of the target population. The description of the procedure to compute them is contained in the document Weighting EVS17 Data.
pweight	Population size weights	These are meant for rescaling the weights to a shared denominator across all countries and correspond to (target population size)/[(sample size)*10000]. This variable should be used when analyzing the full sample of each country (also mixed-mode). It replicates pweight taking into account the mode structure, hence it splits the sample size conditionally on the mode (interviewer-administered/self-administered) for the six mixed-mode countries. Compared to pweight, this variable should be used when, in the six mixed-mode countries (CH, NL, IS, DE, FI and DK), interviewer-administered interviewers (CAPI, PAPI) are distinguished from self-administered interviews (CAWI, Mail). E.G. If one wants to only analyze interviewer-administered data (CAPI, PAPI), mm_pweight should be used.
mm_pweight	Population size weights: mode	It replicates pweight taking into account the mode structure, hence it splits the sample size conditionally on the mode (interviewer-administered/self-administered) for the six mixed-mode countries. Compared to pweight, this variable should be used when, in the six mixed-mode countries (CH, NL, IS, DE, FI and DK), interviewer-administered interviewers (CAPI, PAPI) are distinguished from self-administered interviews (CAWI, Mail). E.G. If one wants to only analyze interviewer-administered data (CAPI, PAPI), mm_pweight should be used.

ager_r_weight	CALIBRATION variable: Age in categories	Calibration variable. It replicates age_r3 (unless country-specific deviations were needed, see Weighting EVS17 Data). It contains also imputed values for those respondents with missing values on the source variable (age_r3).
v225_weight	CALIBRATION variable: Gender	Calibration variable. It replicates v225. It contains also imputed values for those respondents with missing values on the source variable (v225). Calibration variable. It replicates v243_r (unless country-specific deviations were needed, see Weighting EVS17 Data). It contains also imputed values for those respondents with missing values on the source variable (v243_r).
v243_r_weight	CALIBRATION variable: Educational level	Calibration variable. It replicates v243_r (unless country-specific deviations were needed, see Weighting EVS17 Data). It contains also imputed values for those respondents with missing values on the source variable (v243_r).
NUTS_weight	CALIBRATION variable: Region at NUTS2 level	Calibration variable. It replicates v275b_N2 (unless country-specific deviations were needed, see Weighting EVS17 Data). It contains also imputed values for those respondents with missing values on the source variable (v275b_N2).

1.4.11 Country-specific variables

Country-specific variables, i.e. variables created for questions which could not be harmonized, or questions the country additionally included in the field questionnaire, are named by the alphanumerical country code (e.g., "_it" for Italy according to ISO 3166-1 alpha-2). Their positions in the datasets mirror their positions in the field questionnaires. The following table gives an overview of additional country-specific variables.

Table 18: Overview of country-specific variables

Deviation applying to the German data: for CAWI and Mail matrix-design survey (survey_de = 4, 5, 6, and 7) the genuine scale 1, 2, 3, 4 was falsely changed to include an additional middle-category ("neither agree nor disagree"): 1, 2, 2.5, 3, 4. The error is corrected for the CAWI and Mail full length survey.

v72_DE	DE MODIFIED (additional middle cat): child suffers with working mother (Q25A)
v73_DE	DE MODIFIED (additional middle cat): women really want home and children (Q25B)
v74_DE	DE MODIFIED (additional middle cat): family life suffers when woman has full-time job (Q25C)
v75_DE	DE MODIFIED (additional middle cat): man's job is to earn money; woman's job is to look after home and family (Q25D)
v76_DE	DE MODIFIED (additional middle cat): men make better political leaders than women (Q25E)
v77_DE	DE MODIFIED (additional middle cat): university education more important for a boy than for a girl (Q25F)
v78_DE	DE MODIFIED (additional middle cat): men make better business executives than women (Q25G)
v79_DE	DE MODIFIED (additional middle cat): one of main goals in life has been to make my parents proud (Q25H)

Deviation applying to the Swedish data: Due to a mistake in the field questionnaire that was later corrected, respondents got slightly different question wording; indicated by the flag variable.

f112_SE	SE MODIFIED QUESTION: are you willing to fight for country (Q36) 1 Wording of Q36 using the term 'strida för' 2 Wording of Q36 using the term 'försvara'
---------	--

Deviation applying to the data of Denmark (CAWI/Mail), Finland (Mail), Netherlands (CAWI), Iceland (Mail): Answer category "0 It is against democracy", which in CAPI mode is not read out, nor visible on show cards, is visible in CAWI and/or Mail mode questionnaire.

v133_11c	MODIFIED (cat. 0 displayed): democracy: governments tax the rich and subsidize the poor (Q39A)
v134_11c	MODIFIED (cat. 0 displayed): democracy: religious authorities interpret the laws (Q39B)
v135_11c	MODIFIED (cat. 0 displayed): democracy: people choose their leaders in free elections (Q39C)
v136_11c	MODIFIED (cat. 0 displayed): democracy: people receive state aid for unemployment (Q39D)
v137_11c	MODIFIED (cat. 0 displayed): democracy: the army takes over when government is incompetent (Q39E)
v138_11c	MODIFIED (cat. 0 displayed): democracy: civil rights protect people from state oppression (Q39F)
v139_11c	MODIFIED (cat. 0 displayed): democracy: the state makes people's incomes equal (Q39G)
v140_11c	MODIFIED (cat. 0 displayed): democracy: people obey their rulers (Q39H)
v141_11c	MODIFIED (cat. 0 displayed): democracy: women have the same rights as men (Q39I)

Deviation applying to the Danish data: Answer category 4 "Not at all often" is missing in field questionnaire and in CAWI/CAPI data.

v176_DK	DK MODIFIED (cat 4 dropped): how often in country's elections: votes are counted fairly (Q50A)
v177_DK	DK MODIFIED (cat. 4 dropped): how often in country's elections: opposition candidates are prevented from running (Q50B)
v178_DK	DK MODIFIED (cat. 4 dropped): how often in country's elections: TV news favors the governing party (Q50C)
v179_DK	DK MODIFIED (cat. 4 dropped): how often in country's elections: voters are bribed (Q50D)
v180_DK	DK MODIFIED (cat. 4 dropped): how often in country's elections: journalists provide fair coverage of elections (Q50E)
v181_DK	DK MODIFIED (cat. 4 dropped): how often in country's elections: election officials are fair (Q50F)
v182_DK	DK MODIFIED (cat. 4 dropped): how often in country's elections: rich people buy elections (Q50G)
v183_DK	DK MODIFIED (cat. 4 dropped): how often in country's elections: voters are threatened with violence at the polls (Q50H)

Deviation applying to the Danish data: Answer category "not at all important" is missing in the CAWI part of the data, but is present in the CAPI data.

v221_DK	DK MODIFIED (cat. 4 dropped): important: eliminating income inequalities (Q62A)
v222_DK	DK MODIFIED (cat. 4 dropped): important: basic needs for all (Q62B)
v223_DK	DK MODIFIED (cat. 4 dropped): important: recognizing people on merits (Q62C)
v224_DK	DK MODIFIED (cat. 4 dropped): important: protecting against terrorism (Q62D)

Deviation applying to the Swiss data: The web question was asked in two parts. First, a rough categorization of the level of education was asked. In the second part, the respondent was asked to specify. The error comes from the fact that in the second part, it was even no need to specify who was concerned by the question (something like: "please precise"). Except in German, where the wrong question was asked. It may be that many respondents did not notice that the instruction was about the respondent: the question is in the middle of a question about the partner. The analysis of the correlation with the respondent's level of education (homogamy of education) shows that there is not much difference from other languages or modes. Although this variable appears to provide correct information about the partner's level of training, it is strongly discouraged from using it in some analyses (information provided by the Swiss team).

f252_edulvlb_CH CH MODIFIED QUESTION (WEB_GERMAN): educational level spouse/partner: ESS-edulvlb coding (Q89)
 0 question wording corresponds to standard
 1 2nd question part in German WEB: 'your' instead of 'spouse/partner'. However, in German the pronoun 'Ihr' for 'your' reads the same as for female partner".

1.5 Survey Experiment: EVS17 Italy

The description of the experiments implemented in EVS17 was provided by the Italian EVS team.

1.5.1 Variation of wording of answer categories (translation of disagree)

In previous Italian EVS questionnaires all the batteries regarding agree/disagree with five answer categories were translated with "d'accordo" (in English: agree) and "contrario" (in English: contrary). Although they are synonyms, the term "contrario" could be perceived more negatively than the term "in disaccordo", which is the literally Italian translation of disagree.

Therefore, we would like to test whether there is a wording effect due to translation of the word disagree by proposing both the versions. In order to preserve the comparability with the previous EVS surveys, the batteries Q26 and Q27 maintain the original translation by using the term "contrario". For a similar reason, even in the experimental design we suggest to attribute the original wording of the question and wording categories (Version 1) to the 70% of the sample, while the experimental manipulation (Version 2) will involve 30% of the sample.

The experimental design, here presented, applies to the following batteries:

Q12 (5 items: Q12A-Q12E)
 Q56 (5 items: Q56A-Q56E)

Battery Q12 is the first one in the questionnaire with that set of answer categories, while two other batteries (Q26 and Q27) preceding Q56 contain the same answer modalities. In such a way, we would include the experiment both in a battery with no priming and in a battery with possible priming (even though Q26 and Q27 are far from Q56 in the questionnaire).

VERSION 1 – ORIGINAL => 70% of the sample E' d'accordo o <u>contrario</u> con le seguenti affermazioni? Molto d'accordo D'accordo <u>Né d'accordo né contrario</u> <u>Contrario</u> <u>Molto contrario</u>
VERSION 2 => 30% of the sample E' d'accordo o in <u>disaccordo</u> con le seguenti affermazioni? Molto d'accordo D'accordo <u>Né d'accordo né in disaccordo</u>

In disaccordo
Molto in disaccordo

When looking at the distributions of all the variables, we did not observe any significant difference in the distributions between the two experimental condition.

1.5.2 Variation of item wordings (migrants/foreign workers vs foreign workers vs migrants)

In the battery Q6, aimed at measuring the social distance with certain groups of individuals, the item Q6C (Immigrati/lavoratori stranieri, in English: migrants/foreign workers) could lead to some ambiguity in the cognitive process of answering, since some individuals could focus more on foreign workers, others on migrants, while others could give the same weights to both the categories.

In order to face this issue, we would propose an alternative formulation where simply referring to foreign workers or migrants. Doing this, we could estimate whether the social distance lowers when deleting the term "migrants" or increases when deleting the term "foreign workers", and to what extent. Furthermore, whenever an effect is detected, we could even test whether the effect is stronger among specific social groups.

Experimental design: Item Q6C

[Su questo cartellino sono elencati diversi tipi di persone. Può indicarmi se c'è qualcuno fra questi che non vorrebbe avere come vicini di casa?]

VERSION 1 – ORIGINAL => 70% of the sample
Immigrati/lavoratori stranieri (Eng: Migrants/foreign workers)

Menzionato
 Non menzionato

VERSION 2 => 15% of the sample
Lavoratori stranieri (Eng: Foreign workers)

Menzionato
 Non menzionato

VERSION 3 => 15% of the sample
Immigrati (Eng: Migrants)

Menzionato
 Non menzionato

Findings show that respondents provide a different meaning to the items "immigrants" and "foreign workers". Moreover, when answering the traditional item on "immigrants/foreign workers" the former outweighs the latter.

1.6 Anonymisation measures

The second pre-release of EVS 2017 is constructed as an off-site Scientific-Use File (SUF) including all anonymized variables based on the common EVS questionnaire program. It is released for direct access.

Along with the Full Data Release (scheduled for December 2019) an additional Scientific-Use File will be generated for all variables that cannot be included into the off-site SUF due to the data's sensitive nature. The result will be contracted off-site access to an extended Scientific-Use File or on-site controlled access.

Comparable to the first pre-release, several common and country-specific anonymization measures were applied to transform publicly disseminated data to de facto anonymous data that still contain as much information as possible and comply with the demands of confidentiality. Even if direct identifiers were removed or indirect identifiers with detailed text information were recoded, data still contain a lot of factual information about respondents that might be problematic together or in combination with other information.

As this depends on the population characteristics of a country and its regions, anonymity must be finally assessed at country level. Therefore, every national team was responsible for checking their data with confidentiality and local regulations in mind.

To better protect small urban districts/municipalities and individuals with characteristics that stand out, three key variables were considered in the common 'risk assessment' done by the central teams: Region of interview on NUTS-3 level, Size of municipalities further subdividing NUTS units, Respondent's and spouse/partner's occupation ISCO08 4/3 digit code. Further variables were considered to reduce disclosure risks.

General anonymization measures applied:

- Removing highly detailed information: variables NUTS3, ISCO-4/3 digits dropped
- Combining categories:
 - o 8 categories of 'Size of town' variable are combined into 5 categories
 - o ISCO_2: the three categories 'armed forces' were combined into one category 0 "Armed Forces Occupations".
 - o Rare countries in 'country of birth' variables have been recoded into coarser sub-regions according to the M49 standard (Composition of macro geographical (continental) regions, geographical sub-regions, and selected economic and other groupings: <http://unstats.un.org/unsd/methods/m49/m49regin.htm>. Since there is no alphanumerical code for such region classification, the numerical codes would be hold in the alphanumerical variables.)

In consultation with the national teams, country-specific anonymisation measures were carried out. An overview of measurements is given in Table 19.

Table 19: Overview of anonymization measures applied

Variable label	Variable name	Common precautions	Country-specific precautions
which religious denomination do you belong to (Q13a) (harmonized)	v52		AT: recode 3 "free church..." "(1 case), 4 "Jew" (2cases), 7 "Buddhist" (2cases) into 9 "Other" NL: recode 4 "Jew" (1 case), 7

2 Variable Documentation and types of notes added

The variable documentation describes each variable in the Integrated Dataset in terms of relevant metadata. It is set up by means of the GESIS Dataset Documentation Manager (DSDM) and in accordance with the international metadata specification for the social and behavioural sciences, established by the Data Documentation Initiative (DDI-Codebook/XML).

The documentation combines the variable description (variable name, values, and labels) of the dataset with the exact wording and sequence of question components (question text, interviewer instruction, response categories, etc.) from the questionnaire.

2.1 Information provided by NOTES

General remarks and comments referring to a certain variable are defined as variable notes. Notes could be references to international standards applied or EVS coding frames, problems in questionnaire translation, but also references to data problems or specific characteristics. A distinction between two types of variable notes can be made:

- Notes referring to the Integrated Dataset, which imply all national datasets,
- Notes referring to a single national dataset.

Notes with reference to the Integrated Dataset

- For harmonized variables (religion, left/right political preference, education, income) information is given on the international standards or EVS coding frames used and the respective standardized country-specific source variable ("_cs" variables) included in the data.
- For standardized country-specific source variables (religion, political party preference, education, income) containing a country identifier (ISO 3166-1), information on the order of country-specific categories in the field questionnaires, as well as a reference to the respective harmonized variable is given.
- Standardized variables include a reference to the international standard used (nationality - ISO 3166-1 alpha-2 code, region - NUTS code, and occupation - ISCO08).
- Translation notes as provided by the translation management tool TMT.
- Information on anonymization measures.

Notes with reference to national data

- Notes referring to deviations between the master and the field questionnaire
- Notes documenting translation problems
- Information on data processing
- Information on anonymization measures

In general, the abbreviations in Table 6 are used to indicate countries. As far as applicable, the ISO 3166-1 alpha-2 codes have been applied and coded accordingly in the alphanumeric sample identification variable c_abrv 'country abbreviation'.

Information on the Variable Documentation

The complete question and answer texts are taken from the English Master Questionnaire as provided by the European Values Study. The content and construction of technical, administrative, or other generated variables is described as appropriate.

- *Digital Object Identifier (doi)*: Header with doi linked to the Study Description in the GESIS Data Catalogue.
- *VARIABLE NAME* (serial number from questionnaire or assigned by the archive) and *VARIABLE LABEL* as defined in the dataset, including question number. The numbers or letters that may appear together with the variable name reflect the item order (multiple item or multiple response questions) or indicate whether a question was recoded (_r) or harmonized.
- *QUESTION NUMBER* and full *QUESTION TEXT* from the Master Questionnaire, including interviewer instructions.
- *CODE VALUES* occurring in the data for a particular variable and the complete *ANSWER TEXT* from the Master Questionnaire. Code values may differ from the questionnaire specification due to standardization/ harmonization.
- *NOTES* delineate additional explanatory text subsuming trend information or archive remarks on data processing and other issues relevant for the understanding and application of the variable.
- *DERIVATION* information refers to the construction principle of indices or other derived variables (not in the example).

3.2 Variable Documentation EVS 2017

doi - Digital Object Identifier

Digital Object Identifier (DOI)

This variable holds the Digital Object Identifier (DOI) for the dataset at hand as registered via the da|ra registration agency for economic and social science data. Each dataset version (see variable 'version') has a unique persistent DOI.

For direct access to the complete archive dissemination package for this study, including new dataset versions, the DOI needs to be appended to the resolver service URL: <http://dx.doi.org/doi:10.4232/1.13314>.

In terms of good scientific practice, the DOI is an important element for the correct citation of a dataset.

Variable, Label

Question Text (English Language)

version - GESIS archive version

GESIS Archive Version and date (EVS 2017 Integrated Dataset):

2.0.0 '2018-07-15'

This variable identifies the GESIS archive version number of this data set and the corresponding release date, recorded as an alphanumeric string. The version number is composed of a sequence of three numbers. The major number is incremented when there are changes in the composition of the data set (e.g. additional variables or cases), the minor or second number is incremented when significant errors have been fixed (e.g. coding errors, misleading value labels), and the third or revision number is incremented when minor bugs are fixed (e.g. spelling errors in variable or value labels).

For details of the version history and for information on errata in current or former dataset versions, please consult the GESIS data catalogue entry (study description) persistently referenced by the dataset DOI (Digital Object Identifier).

Note:

Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific categories (religious denominations). This variable has been harmonized into v52.

For the mapping between source and target variable, see App. 1.

The list of religious denominations in the dataset also includes religions verbatim mentioned by more than 1% of country's sample in the "Other"-variable (variables with verbatim records are not part of this dataset).

Austria, Finland, Netherlands:

For data protection reasons few respondents belonging to minoritarian religious denominations in country have been recoded to 9 'other'.

-2 no answer

-1 dont know

1 personal God

2 spirit or life force

3 don't know what to think

4 no spirit, God or life force

Translation note: By 'personal God', we mean a deity or Supreme Being who is conceived of as a person in the sense of having preferences and plans, feeling anger or approval, and so on, and to whom one can relate in a personal way. The contrast is with an impersonal higher power. What we do NOT mean is that each person has God inside them or something like that.

- 2 quite a lot
- 3 not very much
- 4 none at all

Translation note: By 'social media' we mean online facilities that allow users to share information, such as Facebook, Twitter, Google+, Instagram, Reddit, YouTube and many others.

The item should NOT include examples of social media (e.g. "Social media (like Facebook, Twitter etc.)"). If the term "social media" could be misunderstood in your country/language, you may add an interviewer instruction with the examples of social media, specifying that the interviewer should ONLY give examples in case the respondent asks for clarification.

10 an essential characteristic of democracy

Denmark (CAWI & Mail), Finland (Mail), Iceland (Mail), Netherlands: Due to a deviation in the field questionnaire used for the CAWI/Mail surveys the answer category 0 'it is against democracy', which in CAPI/PAPI is not to read out/visible in the show cards, was visible in the mentioned surveys. This may result in higher proportions of respondents choosing this option. Thus they are not comparable across countries/modes. Affected cases are coded -4 'item not included'. For the MODIFIED VARIABLES, see v133_11c - v141_11c.

Denmark (CAWI & Mail), Finland (Mail), Iceland (Mail), and Netherlands (CAWI): MODIFIED VARIABLE (cat. 0 displayed)

Q39_11c

<SHOWCARD 39>

<READ OUT AND CODE ONE ANSWER PER LINE>

Many things are desirable, but not all of them are essential characteristics of democracy. Please tell me for each of the following things how essential you think it is as a characteristic of democracy. Use this scale where 1 means "not at all an essential characteristic of democracy" and 10 means it definitely is "an essential characteristic of democracy"

in CAWI,MAIL:

Many things are desirable, but not all of them are essential characteristics of democracy. Please indicate for each of the following things how essential you think it is as a characteristic of democracy. Use this scale where 1 means "not at all an essential characteristic of democracy" and 10 means it definitely is "an essential characteristic of democracy"

How essential do you think this is as a characteristic of democracy?

Q39_11c.D People receive state aid for unemployment.

10 an essential characteristic of democracy

Due to a deviation in the field questionnaire used for the CAWI and/or Mail surveys the answer category 0 'it is against democracy', which in CAPI/PAPI is not to read out/visible in the show cards, was visible in the mentioned surveys. This may result in higher proportions of respondents choosing this option. Thus they are not comparable across countries/modes. Affected cases are coded -4 'item not included' in the master variables v133 - v141.

Note:

Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific categories (political parties). This variable has been harmonized into v174_LR.

For the mapping between source and target variable, see App. A2.

Answer category "66 – No party appeals to me (spontaneous)" was first included in Master Questionnaire alert 05. If the field questionnaire did not contain this category, corresponding verbatim answers in the "Others"-variable were identified by the national teams and recoded into 66.

The list of political parties in the dataset also includes parties verbatim mentioned by more than 1% of country's sample in the "Other"-variable (variables with verbatim records are not part of this dataset).

Variable, Label

Question Text (English Language)

v175_LR - political party: another appeals to you: left/right scale (Q49a)

Q49a

Is there another party that appeals to you?

-10 multiple answers Mail

-9 no follow-up

-8 follow-up non respons

-7 matrix not applied

-6 na (survey break-off)

-5 other missing

-4 item not included

44 not classifiable

Note:

Harmonized variable: country-specific categories have been recoded according to the placement of national political parties on a left-right scale as delivered by country; for country-specific variable, see v175_cs.

For the mapping between source and target variable, see EVS 2017 Variable Report, App. A2.

Denmark (CAWI&Mail), France, Great Britain, Iceland, Italy, Lithuania, Norway, Russia, and Slovakia: Additional country-specific filter - if 'dk', 'na' or 'no party' in v174, skip v175.

Variable, Label**Question Text (English Language)**

v175_cs - is there another party that appeals to you (Q49a) (ISO 3166-1, country-specific)

Q49a

Is there another party that appeals to you?

Note:

Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific categories (political parties). This variable has been harmonized into v175_LR.

For the mapping between source and target variable, see App. A2.

Answer category "66 – No other party appeals to me (spontaneous)" was first included in Master Questionnaire alert 05. If the field questionnaire did not contain this category, corresponding verbatim answers in the "Others"-variable were identified by the national teams and recoded into 66.

The list of political parties in the dataset also includes parties verbatim mentioned by more than 1% of country's sample in the "Other"-variable (variables with verbatim records are not part of this dataset).

Denmark (CAWI&Mail), France, Great Britain, Iceland, Italy, Lithuania, Norway, Russia, and Slovakia: Additional country-specific filter - if 'dk', 'na' or 'no party' in v174, skip v175.

-5 other missing

-4 item not included

-3 not applicable

-2 no answer

-1 dont know

1 very bad

2 quite bad

3 neither good, nor bad

4 quite good

5 very good

Austria, Bulgaria, Netherlands, Slovenia, Slovakia: In contrast to other questions, the values in question Q51 in the master questionnaire are assigned in descending order from 5 "very good" to 1 "very bad". In some countries the codes were assigned in ascending order from 1 "very good" to 5 "very bad". In this case, the data have been recoded according to the Mater questionnaire.

Translation note: Here 'impact' just means 'effect' or 'influence'. We are asking whether the presence of people from elsewhere is positive or negative overall. (Impact would include socially positive features such as contributions to the economy, enriching the culture through new food and music, etc., and socially negative features such as lowering wages, requiring social support, etc.).

4 less often

5 never

Translation note: By 'social media' we mean online facilities that allow users to share information, such as Facebook, Twitter, Google+, Instagram, Reddit, YouTube and many others.

The item should NOT include examples of social media (e.g. "Social media (like Facebook, Twitter etc.)"). If the term "social media" could be misunderstood in your country/language, you may add an interviewer instruction with the examples of social media, specifying that the interviewer should ONLY give examples in case the respondent asks for clarification.

v234 - current legal marital status respondent (Q72)

Q72

<ASK ALL>

What is your current legal marital status?

<WIDOWED AND DIVORCED FROM A MARRIAGE OR REGISTERED PARTNERSHIP ONLY, NOT FROM COHABITATION>

<(Q72=6 || Q72=8 || Q72=9) GOTO Q74>

in CAWI,MAIL:

<"Widowed" and "divorced" should only refer to previous marriage or registered partnership, and NOT to cohabitation.>

-10 multiple answers Mail

-9 no follow-up

-8 follow-up non respons

-7 matrix not applied

-6 na (survey break-off)

-5 other missing

-4 item not included

-3 not applicable

-2 no answer

-1 dont know

1 married

2 registered partnership

3 widowed

4 divorced

5 separated

6 never married and never registered partnership

Belarus, Georgia, Poland, Russia: answer category 2 'registered partnership' was not implemented because it is not a legal form of union in country.

Russia: answer category 5 'separated' not included in field questionnaire.

Estonia: Due to an error in field questionnaire, the filter used for v236 and v237 differs from the master questionnaire. Widowed, divorced and separated respondents were not asked about their current cohabitation or relationship. Consequently, they also skipped all spouse/partner related questions and are coded with "NAP" in v250 to v258 (n=445).

Great Britain: Due to an error in the implementation of field questionnaire in CAPI, the filter used for v236 and v237 differs from the master questionnaire. All married (834 cases), or in registered partnership (12 cases) respondents have answered the question (v236) although shouldn't. Consequently all married not living with partner (n=63) answered v237. Answers have not been cleaned. On the other hand, respondents who were never married or in registered partnership (v234=6, n=478) skipped v236 and v237, although should have been asked the question. Consequently, they also skipped all spouse/partner related questions and are coded with "NAP" in v250 to v258. They have been coded 9 ,no answer'.

Serbia: Due to an error in edited field questionnaire, the filter instructions are contradictory: While the skipping instructions in Q72 (v234): 6-9 go to Q74 are conform with the master questionnaire, the Interviewer instruction for Q74 (v236) is "AKO JE U ISPITANIK U BRAKU ILI REGISTROVANOM PARTNERSTVU" (ask if respondent is married or in registered partnership), who should actually skip to Q76. This

deviations leads to filter inconformities in the data.

All married (n=725)/in registered partnership (n=41) have been asked v236. All widowed (n=145), divorced (n=118) & separated (n=5) respondents have skipped v236. Respondents who were never married or in registered partnership or coded missing (n=466) should have been asked v236: due to the contradictory filter instructions, n=301 respondents have substantial answers and 165 skipped the question and are coded as -2 ,no answer'.

For all cases, answer pattern in v237 is clearly non-conform with any of the instructions.

-5 other missing

-4 item not included

-3 not applicable

-2 no answer

-1 dont know

1 yes

2 no

Some respondents live with their partner (v236=1) and still live alone (v240=1). These are not necessarily inconsistent answers, as some people live together but at separate addresses (LAP=living apart together).

Bulgaria: Filter inconformity: n=95 cases have answers, although they should not have been asked the question due to routing (v234=1,2).

Estonia: Due to an error in field questionnaire, the filter used for v236 and v237 differs from the master questionnaire. Widowed, divorced and separated respondents were not asked about their current cohabitation or relationship. Consequently, they also skipped all spouse/partner related questions and are coded with "NAP" in v250 to v258 (n=445).

Great Britain: Due to an error in the implementation of field questionnaire in CAPI, the filter used for v236 and v237 differs from the master questionnaire. All married (834 cases), or in registered partnership (12 cases) respondents have answered the question (v236) although shouldn't. Consequently all married not living with partner (n=63) answered v237. Answers have not been cleaned. On the other hand, respondents who were never married or in registered partnership (v234=6, n=478) skipped v236 and v237, although should have been asked the question. Consequently, they also skipped all spouse/partner related questions and are coded with "NAP" in v250 to v258. They have been coded 9 ,no answer'.

Serbia: Due to an error in edited field questionnaire, the filter instructions are contradictory: While the skipping instructions in Q72 (v234): 6-9 go to Q74 are conform with the master questionnaire, the Interviewer instruction for Q74 (v236) is "AKO JE U ISPITANIK U BRAKU ILI REGISTROVANOM PARTNERSTVU" (ask if respondent is married or in registered partnership), who should actually skip to Q76. This deviations leads to filter inconformities in the data.

All married (n=725)/in registered partnership (n=41) have been asked v236. All widowed (n=145), divorced (n=118) & separated (n=5) respondents have skipped v236. Respondents who were never married or in registered partnership or coded missing (n=466) should have been asked v236: due to the contradictory filter instructions, n=301 respondents have substantial answers and 165 skipped the question and are coded as -2 ,no answer'.

For all cases, answer pattern in v237 is clearly non-conform with any of the instructions.

Consequently, there are also filter inconsistencies in all spouse/partner related questions v250 to v258.

Q77A Number of children in household

- 6 na (survey break-off)
- 5 other missing
- 4 item not included
- 3 not applicable
- 2 no answer
- 1 don't know
- 4 4 and more

Note:

For data protection reasons, respondents with 4 children and more in household have been recoded to 4 '4 children and more'.

Czechia, Denmark, Finland, Germany, Great Britain, Iceland, Lithuania, Netherlands, Norway, Poland, Serbia, Slovenia, Sweden, Switzerland:

Content related inconsistencies: In n=343 cases the number of children living in household exceeds the overall number of people living in household.

Countries reported some difficulties in defining households and children to be counted to live in HH. This probably explains the inconsistencies between the number of children living in HH and total number of persons in household.

Belarus: Additional interviewer instruction pointing out that children are also considered to be partner's children, adopted children, and step children.

Germany: Refined interviewer instruction during the fieldwork to point out that answers need to be consistent with the number of persons in household.

Variable, Label

Question Text (English Language)

v239b - number of children outside household (Q77B)

Q77

How many children do you have? Please tell me how many of them live in your household and how many live elsewhere:

in CAWI,MAIL:

How many children do you have? Please indicate how many of them live in your household and how many live elsewhere:

<If you do not have children, just write 0>

Q77B Number of children outside household

- 6 na (survey break-off)
- 5 other missing
- 4 item not included
- 3 not applicable
- 2 no answer
- 1 don't know
- 4 4 and more

Note:

For data protection reasons, respondents with 3 children and more outside household have been recoded to 3 '3 children and more'.

Countries reported some difficulties in defining households and children to be considered that lead to inconsistencies between the number of children in HH and the number of people living in household.

Belarus: additional interviewer instruction pointing out that children are also considered to be partner's children, adopted children, and step children.

Germany: refined interviewer instruction during the fieldwork to point out that answers need to be consistent with the number of persons in household.

Variable, Label

Question Text (English Language)

v240 - number of people in household (Q78)

Q78

Including yourself, how many people – including children – live here regularly as members of this household?

<If you live alone, just write 1 and skip the next question>

<(Q78=1) GOTO Q80>

Write in:

-6 na (survey break-off)

-5 other missing

-4 item not included

-3 not applicable

-2 no answer

-1 don't know

7 7 and more

Note:

For data protection reasons, respondents with 7 people or more living in household have been recoded to 7 '7 and more'.

Content related inconsistencies between number of people living in household and related variables like "living with partner" (v236=1), living with parents/parents in law (v238=2,3,4) and number of own children in household (v239a) might be an indicator of different understanding of household.

Czechia, Denmark, Finland, Germany, Great Britain, Iceland, Lithuania, Netherlands, Norway, Poland, Serbia, Slovenia, Sweden, Switzerland: In n=343 cases the number of children living in household exceeds the overall number of people living in household.

In some countries respondents (total n=558) stated to live with their partner (v236=1) and still live alone (v240=1). These are not necessarily inconsistent answers, as some people live together but at separate addresses (LAP=living apart together).

In some countries respondents (total n=139) stated to live with parents/parents in law/both (v238) and even though answered to be living alone. These are not necessarily inconsistent answers, as some people could be living in the same house as their parents, but with independent economic households.

Variable, Label

Question Text (English Language)

v241 - age of youngest person in household (Q79)

Q79

<(Q78!=1) ASK Q79>

And what is the age of the youngest person in your household?

Write in:

-6 na (survey break-off)

-5 other missing

-4 item not included

-3 not applicable

-2 no answer

-1 don't know

80 80 and older

Note:

For data protection reasons, all cases with age of youngest person in HH over 80 years of age have been recoded to '80 and older'.

In earlier versions of the master questionnaire, the response category 777 "nap" was missing. As a result, filter inconsistencies have occurred in some countries. The data has been corrected according to the filter statement in the Master Questionnaire: If the respondent lives alone, v241=777.

Albania, Czechia, Denmark, Estonia, Germany, Georgia, Netherlands, Norway, Romania, Serbia, Switzerland: Content related inconsistencies: In few cases the person mentioned as the youngest in household is significantly older than the respondent himself (total n=122).

In some countries respondents stated their age or older for the youngest person in the household, although there are children living in household (total n=284). Countries reported some difficulties in defining households and children to be counted to live in. This probably explains the inconsistencies related to number of children and household.

Q80

<ASK ALL>

At what age did you complete your full time education, either at school or at an institution of higher education? Please exclude apprenticeships.

<If respondent is still at school, ask:>

At what age do you expect you will have completed your education?

Write in age:

in CAWI,MAIL:

If you are still at school, please indicate at what age do you expect you will have completed your education.

If you did not have any formal education, please write 0

-6 na (survey break-off)

-5 other missing

-4 item not included

-3 not applicable

-2 no answer

-1 don't know

0 no formal education

7 7 and younger

70 70 and older

Note:

For data protection reasons, all respondents that completed education up to 7 years of age have been recoded to '7 and younger'; all respondents that completed education over 70 years of age have been recoded to '70 and older'.

Austria: For data protection reasons one respondent has been recoded to -2 'no answer'.

Albania, Denmark, Finland, France, Germany, Great Britain, Iceland, Italy, Netherlands, Serbia, Slovenia, Spain, Switzerland: In total n=339 respondents indicated to do not have any formal education (v242=0) but also stated having a certain level of education (v243_edulvlvb gt 0).

Some respondents stated to have complete a higher educational level in a low age. They could have mentioned the duration of their educational level rather than their age by completion of it. A better approximation could be to calculate the average age by completion of that level.

75624 CH: other

Note:

Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific educational categories. Variable

has been harmonized according to ESS-eduvlbl. For the mapping between source and target variable, see EVS 2017 Variable Report, App. A3.

Austria: For data protection reasons some respondents have been recoded to more general categories.

Germany: Educational level is measured by three questions in the field questionnaire: 1. highest school leaving certificate, 2. highest university leaving certificate, 3. highest vocational training certificate. Country-specific categories and their mapping in the harmonized educational level categories are available in App. 3.

Albania, Denmark, Finland, France, Germany, Great Britain, Iceland, Italy, Netherlands, Serbia, Slovenia, Spain, Switzerland: In total n=339 respondents indicated to do not have any formal education (v242=0) but also stated having a certain level of education (v243_edulvlvb gt 0).

Some respondents stated to have complete a higher educational level in a low age. They could have mentioned the duration of their educational level rather than their age by completion of it. A better approximation could be to calculate the average age by completion of that level.

-8 follow-up non respons

-7 matrix not applied

-6 na (survey break-off)

-5 other missing

-4 item not included

-3 not applicable

-2 no answer

-1 dont know

The routing in the Master Questionnaire treats the category "other" as not in paid employment. Even though there are cases in this category that are in fact in paid employment (e.g. paid parental leave). In this case, it is not clear whether the answers to the following questions refer to the current job of the individual or to a former one.

Germany: Category 04 means "federal voluntary service", not "military service", because there is no compulsory military service any longer.

- 96 Refuse Workers and Other Elementary Workers
- 99 ISCO could not be applied to response given

Note:

Verbatim recorded answers standardized according to 4-digit ISCO08.

Source: <https://www.ilo.org/public/english/bureau/stat/isco/isco08/index.htm>

For data protection reasons all ISCO 4-digit codes have been aggregated to ISCO 2-digit codes.

For data protection reasons the three categories 'armed forces' were combined into one category 0 "Armed Forces Occupations".

Austria, Azerbaijan, Great Britain, Hungary, Sweden, Switzerland: For data protection reasons some respondents with very specific occupations have been recoded to -2 'no answer'.

In case the verbatim recorded answer could not be clearly assigned to an ISCO code, other variables of occupational status could be considered: nr. of employees (v247); people supervised (v248, v248a); work for public/private employer (v249). If no ISCO code could be allocated even then, the case was coded as 99: "ISCO could not be applied to the given answer".

2 private business or industry

3 private non-profit organization

In first versions of the Master questionnaire, Q87 was only formulated in present tense, although the interviewer instruction specifies that currently employed (Q82=1 or 2) or persons who were not self-employed in their last job (Q83=1) should be asked. This is probably the reason for data inconsistencies in few countries.

2 no

Albania: two respondents who are not living with a spouse or partner answered all questions related to spouse/partner (v250 to v258) although they should not have been asked. Both cases are in a steady relationship (v257=1) and might answer the question for this partner.

Estonia: Due to an error in field questionnaire, the filter used for v236 and v237 differs from the master questionnaire. Widowed, divorced and separated respondents were not asked about their current cohabitation or relationship. Consequently, they also skipped all spouse/partner related questions and are coded with "NAP" in v250 to v258 (n=445).

Great Britain: Due to an error in the implementation of field questionnaire in CAPI, the filter used for v236 and v237 differs from the master questionnaire. All married (834 cases), or in registered partnership (12 cases) respondents have answered the question (v236) although shouldn't. Consequently all married not living with partner (n=63) answered v237. Answers have not been cleaned. On the other hand, respondents who were never married or in registered partnership (v234=6, n=478) skipped v236 and v237, although should have been asked the question. Consequently, they also skipped all spouse/partner related questions and are coded with "NAP" in v250 to v258. They have been coded 'no answer'.

Hungary: Due to a translation mistake respondents living with a partner (v236=1) have not been asked all the questions regarding spouse/partner (n=156). Consequently only married or living in registered partnership have valid answers in v250-v258.

Serbia: The contradictory filter instructions in v234, v236 (detailed description in v236) lead to some filter inconsistencies in all variables related to spouse/partner (v250-v258). According to filter applied in FQ only respondents married or in registered partnership and 35 never married but living with partner (summ =806) should have answered questions related to spouse/partner (v250-v258). However filter has not been followed in all cases. Further there are valid answers from some widowed/divorced/separated and respondents never married and never in registered partnership/dk/na, who haven't been asked v236 (n=165).

Note:

Harmonized variable: highest educational level achieved using the ESS-edulvlb classification scheme. For country-specific variable, see v252_cs. For the mapping between source and target variable, see EVS 2017 Variable Report, App. A3 and A4.

Switzerland: Due to an error in the German WEB questionnaire, the question text is ambiguous: It uses the term "Ihre höchste abgeschlossene Ausbildung", which literally means "your education". On the other hand, the respondent may have recognised from the context that it refers to his/her partner/spouse. Flag variable f252_edulvlb_CH indicates the wording version the respondent got.

Albania: two respondents who are not living with a spouse or partner answered all questions related to spouse/partner (v250 to v258) although they should not have been asked . Both cases are in a steady relationship (v257=1) and might answer the question for this partner.

Estonia: Due to an error in field questionnaire, the filter used for v236 and v237 differs from the master questionnaire. Widowed, divorced and separated respondents were not asked about their current cohabitation or relationship. Consequently, they also skipped all spouse/partner related questions and are coded with "NAP" in v250 to v258 (n=445).

Great Britain: Due to an error in the implementation of field questionnaire in CAPI, the filter used for v236 and v237 differs from the master questionnaire. All married (834 cases), or in registered partnership (12 cases) respondents have answered the question (v236) although shouldn't. Consequently all married not living with partner (n=63) answered v237. Answers have not been cleaned. On the other hand, respondents who were never married or in registered partnership (v234=6, n=478) skipped v236 and v237, although should have been asked the question. Consequently, they also skipped all spouse/partner related questions and are coded with "NAP" in v250 to v258. They have been coded 9 ,no answer'.

Hungary: Due to a translation mistake respondents living with a partner (v236=1) have not been asked all the questions regarding spouse/partner (n=156). Consequently only married or living in registered partnership have valid answers in v250-v258.

Serbia: The contradictory filter instructions in v234, v236 (detailed description in v236) lead to some filter inconsistencies in all variables related to spouse/partner (v250-v258). According to filter applied in FQ only respondents married or in registered partnership and 35 never married but living with partner (summ =806) should have answered questions related to spouse/partner (v250-v258). However filter has not been followed in all cases. Further there are valid answers from some widowed/divorced/separated and respondents never married and never in registered partnership/dk/na, who haven't been asked v236 (n=165).

75623 CH: Doctoral degree

75624 CH: other

Note:

Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific educational categories. Variable has been harmonized according to ESS-eduvlbl. For the mapping between source and target variable, see App. A3.

Germany: Educational level is measured by three questions in the field questionnaire: 1. highest school leaving certificate, 2. highest university leaving certificate, 3. highest vocational training certificate. Country-specific categories and their mapping in the harmonized educational level categories are available in App. 3.

Albania: two respondents who are not living with a spouse or partner answered all questions related to spouse/partner (v250 to v258) although they should not have been asked. Both cases are in a steady relationship (v257=1) and might answer the question for this partner.

Estonia: Due to an error in field questionnaire, the filter used for v236 and v237 differs from the master questionnaire. Widowed, divorced and separated respondents were not asked about their current cohabitation or relationship. Consequently, they also skipped all spouse/partner related questions and are coded with "NAP" in v250 to v258 (n=445).

Great Britain: Due to an error in the implementation of field questionnaire in CAPI, the filter used for v236 and v237 differs from the master questionnaire. All married (834 cases), or in registered partnership (12 cases) respondents have answered the question (v236) although shouldn't. Consequently all married not living with partner (n=63) answered v237. Answers have not been cleaned. On the other hand, respondents who were never married or in registered partnership (v234=6, n=478) skipped v236 and v237, although should have been asked the question. Consequently, they also skipped all spouse/partner related questions and are coded with "NAP" in v250 to v258. They have been coded 9 ,no answer'.

Hungary: Due to a translation mistake respondents living with a partner (v236=1) have not been asked all the questions regarding spouse/partner (n=156). Consequently only married or living in registered partnership have valid answers in v250-v258.

Serbia: The contradictory filter instructions in v234, v236 (detailed description in v236) lead to some filter inconsistencies in all variables related to spouse/partner (v250-v258). According to filter applied in FQ only respondents married or in registered partnership and 35 never married but living with partner (summ =806) should have answered questions related to spouse/partner (v250-v258). However filter has not been followed in all cases. Further there are valid answers from some widowed/divorced/separated and respondents never married and never in registered partnership/dk/na, who haven't been asked v236 (n=165).

1 30h a week or more

2 less then 30h a week

3 self employed

4 military service

5 retired/pensioned

6 homemaker not otherwise employed

7 student

8 unemployed

9 disabled

10 other

The routing in the Master Questionnaire treats the category "other" as not in paid employment. Even though there are cases in this category that are in fact in paid employment (e.g. paid parental leave). In this case, it is not clear whether the answers to the following questions refer to the current job of the individual or to a former one.

Germany: Category 04 means "federal voluntary service", not "military service", because there is no compulsory military service any longer.

Albania: two respondents who are not living with a spouse or partner answered all questions related to spouse/partner (v250 to v258) although they should not have been asked . Both cases are in a steady relationship (v257=1) and might answer the question for this partner.

Estonia: Due to an error in field questionnaire, the filter used for v236 and v237 differs from the master questionnaire. Widowed, divorced and separated respondents were not asked about their current cohabitation or relationship. Consequently, they also skipped all spouse/partner related questions and are coded with "NAP" in v250 to v258 (n=445).

Great Britain: Due to an error in the implementation of field questionnaire in CAPI, the filter used for v236 and v237 differs from the master questionnaire. All married (834 cases), or in registered partnership (12 cases) respondents have answered the question (v236) although shouldn't. Consequently all married not living with partner (n=63) answered v237. Answers have not been cleaned. On the other hand, respondents who were never married or in registered partnership (v234=6, n=478) skipped v236 and v237, although should have been asked the question. Consequently, they also skipped all spouse/partner related questions and are coded with "NAP" in v250 to v258. They have been coded 9 ,no answer'.

Hungary: Due to a translation mistake respondents living with a partner (v236=1) have not been asked all the questions regarding spouse/partner (n=156). Consequently only married or living in registered partnership have valid answers in v250-v258.

Serbia: The contradictory filter instructions in v234, v236 (detailed description in v236) lead to some filter inconsistencies in all variables related to spouse/partner (v250-v258). According to filter applied in FQ only respondents married or in registered partnership and 35 never married but living with partner (summ =806) should have answered questions related to spouse/partner (v250-v258). However filter has not been followed in all cases. Further there are valid answers from some widowed/divorced/separated and respondents never married and never in registered partnership/dk/na, who haven't been asked v236 (n=165).

Note:

Verbatim recorded answers standardized according to 4-digit ISCO08. Source:

<https://www.ilo.org/public/english/bureau/stat/isco/isco08/index.htm>

For data protection reasons all ISCO 4-digit codes at have been aggregated to ISCO 2-digit codes.

For data protection reasons the three categories 'armed forces' were combined into one category 0 "Armed Forces Occupations".

Austria, Finland, Great Britain, Hungary, Iceland, Norway, Switzerland: For data protection reasons some respondents with very specific occupations have been recoded to -2 'no answer'.

In case the verbatim recorded answer could not be clearly assigned to an ISCO code, other variables of occupational status could be considered: nr. of employees (v247); people supervised (v248, v248a); work for public/private employer (v249). If no ISCO code could be allocated even then, the case was coded as 99: "ISCO could not be applied to the given answer".

Albania: two respondents who are not living with a spouse or partner answered all questions related to spouse/partner (v250 to v258) although they should not have been asked . Both cases are in a steady relationship (v257=1) and might answer the question for this partner.

Estonia: Due to an error in field questionnaire, the filter used for v236 and v237 differs from the master questionnaire. Widowed, divorced and separated respondents were not asked about their current cohabitation or relationship. Consequently, they also skipped all spouse/partner related questions and are coded with "NAP" in v250 to v258 (n=445).

Hungary: Due to a translation mistake respondents living with a partner (v236=1) have not been asked all the questions regarding spouse/partner (n=156). Consequently only married or living in registered partnership have valid asnwers in v250-v258.

Great Britain: Due to an error in the implementation of field questionnaire in CAPI, the filter used for v236 and v237 differs from the master questionnaire. All married (834 cases), or in registered partnership (12 cases) respondents have answered the question (v236) although shouldn't. Consequently all married not living with partner (n=63) answered v237. Answers have not been cleaned. On the other hand,

respnents who were never married or in registered partnership (v234=6, n=478) skipped v236 and v237, although should have been asked the question. Consequently, they also skipped all spouse/partner related questions and are coded with "NAP" in v250 to v258. They have been coded 9 ,no answer'.

Serbia: The contradictory filter instructions in v234, v236 (detailed description in v236) lead to some filter inconsistencies in all variables related to spouse/partner (v250-v258). According to filter applied in FQ only respondents married or in registered partnership and 35 never married but living with partner (summ =806) should have answered questions related to spouse/partner (v250-v258). However filter has not been followed in all cases. Further there are valid answers from some widowed/divorced/separated and respondents never married and never in registered partnertnership/dk/na, who haven't been asked v236 (n=165).

Estonia: Due to an error in field questionnaire, the filter used for v236 and v237 differs from the master questionnaire. Widowed, divorced and separated respondents were not asked about their current cohabitation or relationship. Consequently, they also skipped all spouse/partner related questions and are coded with "NAP" in v250 to v258 (n=445).

Great Britain: Due to an error in the implementation of field questionnaire in CAPI, the filter used for v236 and v237 differs from the master questionnaire. All married (834 cases), or in registered partnership (12 cases) respondents have answered the question (v236) although shouldn't. Consequently all married not living with partner (n=63) answered v237. Answers have not been cleaned. On the other hand, respondents who were never married or in registered partnership (v234=6, n=478) skipped v236 and v237, although should have been asked the question. Consequently, they also skipped all spouse/partner related questions and are coded with "NAP" in v250 to v258. They have been coded 'no answer'.

Hungary: Due to a translation mistake respondents living with a partner (v236=1) have not been asked all the questions regarding spouse/partner (n=156). Consequently only married or living in registered partnership have valid answers in v250-v258.

Serbia: The contradictory filter instructions in v234, v236 (detailed description in v236) lead to some filter inconsistencies in all variables related to spouse/partner (v250-v258). According to filter applied in FQ only respondents married or in registered partnership and 35 never married but living with partner (summ =806) should have answered questions related to spouse/partner (v250-v258). However filter has not been followed in all cases. Further there are valid answers from some widowed/divorced/separated and respondents never married and never in registered partnership/dk/na, who haven't been asked v236 (n=165).

Note:

Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific educational categories. Variable has been harmonized according to ESS-eduvlbl. For the mapping between source and target variable, see App. A3.

Germany: Educational level is measured by three questions in the field questionnaire: 1. highest school leaving certificate, 2. highest university leaving certificate, 3. highest vocational training certificate. Country-specific categories and their mapping in the harmonized educational level categories are available in App. 3.

- 75620 CH: University diploma and post-graduate (including technical) (Bachelor and short university degree)
- 75621 CH: University diploma and post-graduate (including technical) (degree requiring more than 4 years)
- 75622 CH: University diploma and post-graduate (including technical) (Master)

75623 CH: Doctoral degree

75624 CH: other

Note:

Standardized country-specific variable containing country ISO 3166-1 identifier (CCC) and country-specific educational categories. Variable has been harmonized according to ESS-eduvlbl. For the mapping between source and target variable, see App. A3.

Germany: Educational level is measured by three questions in the field questionnaire: 1. highest school leaving certificate, 2. highest university leaving certificate, 3. highest vocational training certificate. Country-specific categories and their mapping in the harmonized educational level categories are available in App. 3.

v276_r - size of town where interview was conducted Q106 (5 categories)

SIZE OF TOWN. 5-categories (RECODED VARIABLE)

Source variable: v276 (not included for data protection reasons)

[Q106 Size of town]

-6 na (survey break-off)

-4 item not included

-3 not applicable

-2 no answer

-1 don't know

1 under 5000

2 5000-20000

3 20000-100000

4 100000-500000

5 500000 and more

Note:

For data protection reasons some categories have been aggregated into coarser population intervals.

Answer categories in Q106:

01 – under 2000

02 – 2 - 5.000

03 – 5 - 10.000

04 – 10 - 20.000

05 – 20 - 50.000

06 – 50 - 100.000

07 – 100 - 500.000

08 – 500.000 and more

Germany: Size of municipality differs from coding advised by master questionnaire; category 3= 5000-20000; cat. 4 not used.

Variable, Label

Question Text (English Language)

gweight - Calibration weights

CALIBRATION WEIGHTS

These weights are aimed at adjusting some socio-demographic characteristics (age, sex, educational level and region of residence) in the sample population to the distribution of the target population. The description of the procedure to compute them is contained in the document Weighting EVS17 Data.

Variable, Label

Question Text (English Language)

pweight - Population size weights

POPULATION SIZE WEIGHTS

Population size weights are provided for rescaling the weights to a shared denominator across all countries and correspond to (target population size)/[(sample size)*10000]. These weights must be applied whenever one ought to analyze together different countries and avoids the overrepresentation of small countries when compared to bigger ones.

This variable should be used when analyzing the full sample of each country; without distinguishing between modes (also mixed-mode).

Variable, Label

Question Text (English Language)

mm_pweight - Population size weights: mode

POPULATION SIZE WEIGHTS: MODE

It replicates pweight taking into account the mode structure, hence it splits the sample size conditionally on the mode (interviewer-administered/self-administered) for the six mixed-mode countries. Compared to pweight, this variable should be used when, in the six mixed-mode countries (CH, NL, IS, DE, FI and DK), interviewer-administered interviewers (CAPI, PAPI) are distinguished from self-administered interviews (CAWI, Mail). E.G. If one wants to only analyze interviewer-administered data (CAPI, PAPI), mm_pweight should be used.

Variable, Label

Question Text (English Language)

ager_r_weight - CALIBRATION variable: Age in categories

CALIBRATION variable: Age in categories

It replicates age_r3 (unless country-specific deviations were needed, see Weighting EVS17 Data). It contains also imputed values for those respondents with missing values on the source variable (age_r3).
